DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9-26 of U.S. Patent No. 6,346,114. Although the conflicting claims are not identical, they are not patentably distinct from each other because they include substantially the same structural limitations in the claims of the same invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 3731

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, 6, 8-12, 14-15 and 18-20 rejected under 35 U.S.C. 102(e) as being anticipated by MORITA (5,730,753).

MORITA (Figs. 1-5) shows an penetration depth adjusting assembly for use with an injector (col. 4, line 62 to col. 5, line 11) having a housing, a needle holding member, a biasing element, a trigger and an adjusting cap assembly including 2nd cap 3 and 1st cap 5&7. 2nd cap 3 includes threads 17, stop/recess 39/projection 37. 1st cap 5&7 includes threads 53 engaging threads 17 of 2nd cap 3, interior stops or protrusions or nipple 57 engaging recess 39 of 2nd cap 3. The depth of penetration of the injector is adjusted by rotation of 1st cap 5&7 relative to 2nd cap 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5, 7, 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over MORITA (5,730,753) as applied to claim 1 above, and further in view of CYKTICH (5,509,345).

Art Unit: 3731

MORITA discloses substantially all limitations in the claims except for grooves/ridges on thread portion and spring-biased balls as protrusions. CYKTICH discloses balls 48 biased by spring 56 to engage in grooves 64. In view of CYKTICH, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide grooves in the threads 17 of 2nd cap 3 and replace protrusion 57 by a spring-biased ball to engage threads 17 as this would be another choice of design.

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
